## POLYER MANUFACTURING COMPANY LLC

PolyER is one of the leaders in the manufacture of PP, PET, PS food polymer packaging solutions and sheets for Sp™ automatic packaging and thermoforming lines.

Developing our offering to keep up with the current market trends, improving process flows, continuous training, flexibility, as well as using only top-quality and environmentally friendly raw materials are the priorities of the company that contribute to its competitive edge.

PolyER focuses on customer needs and builds B2C on the principles of win-win, conscientious and long-term partnership.

We join the initiatives of leading businesses in reducing the negative environmental impact, sustainability, as well as corporate payment and social responsibilities.

**PolyER**

## OUR MISSION

TO CREATE HIGH-TECH, GOOD-LOOKING  
AND SAFE PACKAGING THAT MAKES PEOPLE'S  
LIVES BETTER

## OUR VALUES:

### **Quality**

The absolute priority across all manufacturing stages from equipment category to customer service level.

### **Innovations**

The use of only high-tech materials and additives, advanced know-how to create unique package properties.

### **Partnership**

The bedrock of our business is respect, responsibility and integrity with our customers and suppliers.

# QUALITY & SAFETY

## HOW DO WE GUARANTEE THE QUALITY OF OUR SOLUTIONS?

The compliance of our solutions with the Russian standards, requirements of the Customs Union and EU are ensured by:

- > ISO 9001:2015 Quality Management Systems
- > FSSC 22000 Food Safety Management Systems

> SEDEX SMETA 4 Pillar Ethical Trade Audit Guide

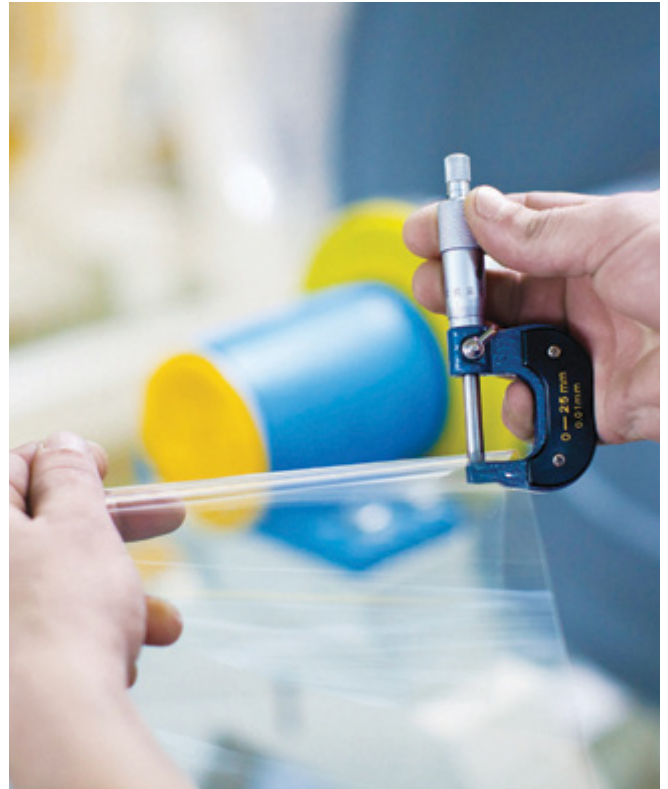

> Modern lab and committed improvement of control methods and parameters for incoming raw materials, process flows and finished products

# SUSTAINABLE DEVELOPMENT

---

**WE JOIN THE INITIATIVES OF LEADING BUSINESSES IN REDUCING THE NEGATIVE ENVIRONMENTAL IMPACT, SUSTAINABILITY, AS WELL AS CORPORATE PAYMENT AND SOCIAL RESPONSIBILITIES.**

---

14001:2015 certificate guarantees our partners that the environmental impact is controlled and continuously reduced.

- > 100% recycling and use of process waste polymers in manufacture
- > more 100% recyclable polymers in the packaging manufacture
- > more recycled polymers in the manufacture
- > less use of natural resources through the systems of dry cooling, heat and water recycling

# DESIGN AND CUSTOMIZED MANUFACTURE OF PACKAGING SOLUTIONS

---

**INDIVIDUAL PACKING BY POLYER IS AN END-TO-END OFFER: FROM AN IDEA, STRUCTURE, DESIGN, CHOICE OF MATERIAL TO MANUFACTURE AND ADJUSTMENT FOR AUTOMATIC PACKAGING LINES.**

---

- > custom engineering and design bureau, pilot production;
- > own sheet extrusion line for molding out of PP, PET, PS;
- > thermoforming equipment and accessories from market leaders;
- > individual technical support of projects at all stages;
- > keeping up with the latest global packaging trends.

WHETHER YOU'RE LOOKING TO IMPROVE THE SUSTAINABILITY OF YOUR PACKAGING, RE-FORMULATE EXISTING PACKAGING, INCREASE YOUR MARKET SHARE, BRING A NEW PRODUCT TO MARKET, RE-POSITION YOUR BRAND, GROW SALES, OR SOLVE LEAN MANUFACTURING AND PRODUCTION CHALLENGES WE'LL WORK HAND-IN-HAND WITH YOU TO ACHIEVE YOUR BEST SOLUTION.

# PACKAGING DECOR

We offer PP and PET cup and container decor with up to 8-color dry offset print options and shrink label.

PRINTED PACKAGING  
IS RECYCLABLE

---

**PACKAGING DECOR IS ANOTHER  
EXTRA TOOL TO MAKE YOUR  
PRODUCT STAND OUT ON THE  
SHELF AND BOOST ITS VISIBILITY  
FOR CONSUMERS.**

---

## ADVANTAGES OF DECOR:

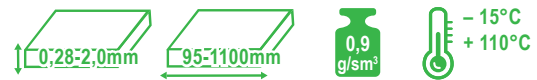

- > **QUALITY** – we use only cutting-edge technologies;
- > **FAST** – minimum lead time 10 days;
- > **COST-EFFECTIVE** – high-quality offset printing is 15% cheaper than cardboard decor, 30% cheaper than shrink label and 50% cheaper than IML;
- > **AFFORDABLE** – minimal order is 50K pcs.

# THERMOFORMING SHEETS

## PP sheets

### TECHNICAL PARAMETERS:

### PROPERTIES:

- > mechanical strength;
- > barrier properties — grease resistance;
- > microwavable;
- > pasteurization and sterilization.

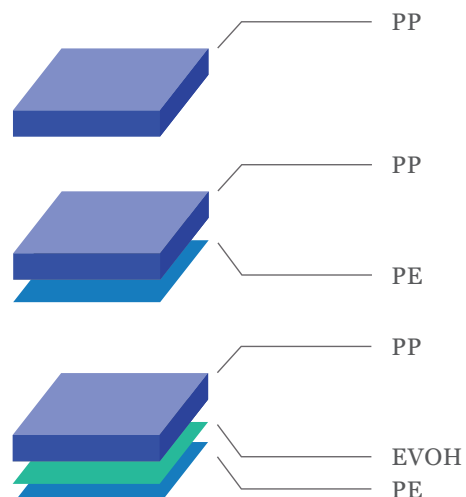

### EXTRA OPTIONS:

colored, double-colored, frost-resistance.

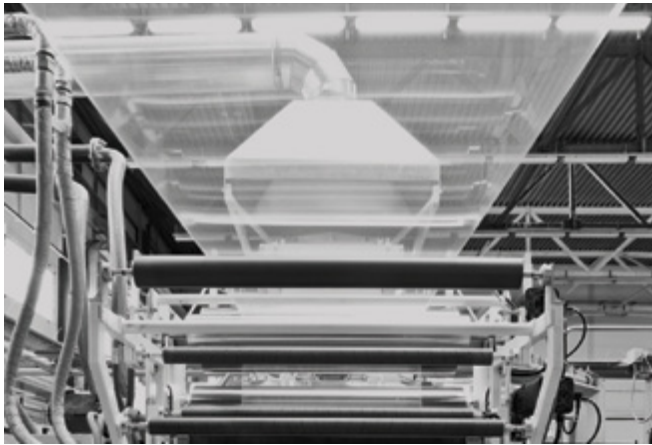

### APPLICATION:

packaging of meat, fish, poultry, ready-to-cook foods, pastry, including with the use of MAP on FFS lines.

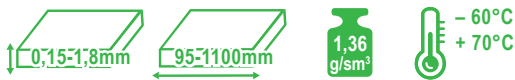

### POSSIBLE COMBINATIONS:

**PET** PET sheets

**TECHNICAL PARAMETERS:**

**PROPERTIES:**

- > high transparency and gloss;
- > mechanical strength;
- > barrier properties;
- > grease resistance.

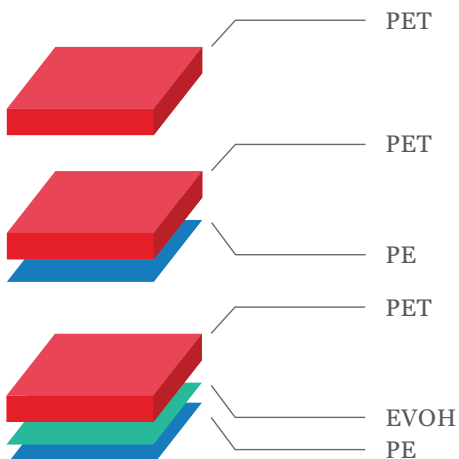

**EXTRA OPTIONS:**

colored, metallic.

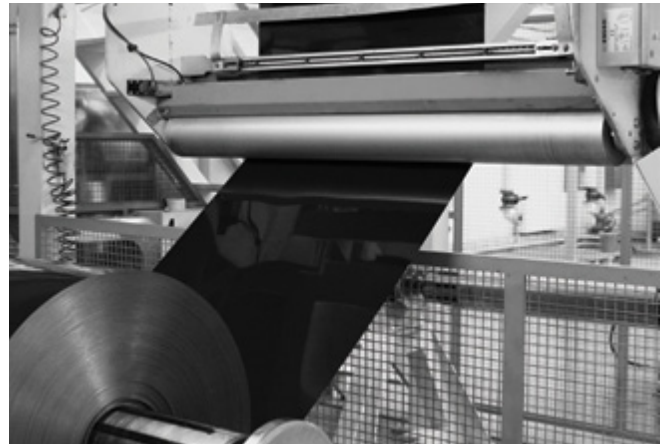

**APPLICATION:**

a solution for pastry, dairy, fish and meat products, ready-to-cook products, baked goods, including with the use of MAP, blisters, correxes, lodgements and tubes.

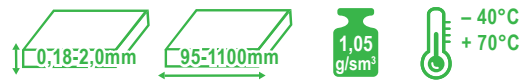

**POSSIBLE COMBINATIONS:**

**PS** PS sheets

**TECHNICAL PARAMETERS:**

**PROPERTIES:**

- > rigidity;
- > mechanical strength;
- > easy to mold.

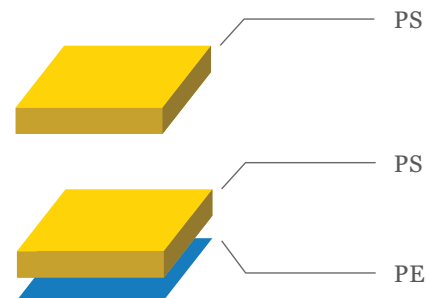

**EXTRA OPTIONS:**

foamed, colored, with a glossy layer, double-colored.

**APPLICATION:**

packaging of dairy, including baby food for children up to 3 years old (PS/PE), desserts, sauces, jams on FFS lines.

**POSSIBLE COMBINATIONS:**

## PP CONTAINERS

Polypropylene containers are suitable for packaging, storage and transportation of cold and hot foods and are microwavable. A variety of shapes and volumes, with a lid or as a sealable option.

# K-1212 PP leak-proof container

To meet numerous customer requests, we are launching the manufacture of polypropylene (PP) containers completely similar to K-1212 and K-1616 PET container lines.

These lines are popular among consumers for their simplicity, elegance, good handling properties, secure and easy lock and most importantly — versatility. Thanks to versatility, these containers are purchased by both retail, HoReCa, and manufacturers of food, ready meals, snacks, desserts. Containers can be used with and without a lid (sealable option).

K-1212 container lid

**Material:** PP

**Color:** transparent

**Size:** 126\*126\*\*16 mm

**Box size:** 655 \*365\*265 mm

**Items per case:** 500 (10\*50) pcs.

## LINE ADVANTAGES:

- > now you can choose the best material for your solution: PET or PP. PP containers are microwavable
- > versatile, leak-proof container that has gained popularity in the market
- > sealing and MAP
- > lid logos

500 ml container

**Material:** PP

**Colors:** black, transparent

**Volume:** 500 ml

**Size:** 126\*126\*60 mm

**Box size:** 655 \*365\*265 mm

**Items per case:** 500 (10\*50) pcs.

375 ml container

**Material:** PP

**Colors:** black, transparent

**Volume:** 375 ml

**Size:** 126\*126\*51,5 mm

**Box size:** 655 \*365\*265 mm

**Items per case:** 500 (10\*50) pcs.

250 ml container

**Material:** PP

**Colors:** black, transparent

**Volume:** 250 ml

**Size:** 126\*126\*\*38,5 mm

**Box size:** 655 \*365\*265 mm

**Items per case:** 500 (10\*50) pcs.

# K-1616 PP leak-proof container

To meet numerous customer requests, we introduce polypropylene (PP) microwavable hot food containers completely similar to K-1616 PET container line.

This line is popular for its simplicity, elegance, good handling properties, secure and easy lock, and most importantly – versatility.

It is purchased by retail, HoReCa, and manufacturers of food, ready meals, snacks, desserts.

Can be used both with a lid or as a sealable option.

## LINE ADVANTAGES:

- > a new version of the already popular K-1212 and K-1616 PET containers
- > hot-food safe and microwavable
- > versatile container will reduce your consumables
- > leak-proof lock will prevent leakage
- > optimal shelf stacking
- > sealability and MAP
- > lid design with your logo, label, ring

K-1616 container lid

**Material:** PP

**Color:** transparent

**Size:** 160\*160\*36 mm

**Box size:** 325\*485\*575 mm

**Items per case:** 450 (75\*6) pcs.

K-1616-375

**Material:** PP

**Colors:** black, transparent

**Volume:** 375 ml

500 (50\*10) pcs.

NEW: up to 8 color  
printing and shrink  
label

# K-115 leak-proof containers

## LINE ADVANTAGES:

- > reliable leak-proof properties preserve food and prevent leakage
- > 35-40% lighter than mold containers
- > material is safe for hot food and microwavable
- > perfect volume for individual meals
- > sealability, use on automatic lines, pasteurization and sterilization
- > smooth lid and bottom help to place information (label, sticker, print)

## FOR MANUFACTURERS, RETAIL AND HORECA

Two global trends — health-consciousness and no opportunity, time or desire to make meals at home, even amidst recession, — drive sustainable growth of HoReCa segment.

K-115K

**Material:** PP

**15% LESS  
WEIGHT**

**PP Newly designed K-139 container**

Newly designed K-139 container specially developed by our designers, our container retained all consumer properties with 15% less weight.

Less polymer packaging weight without changing consumer properties is a modern trend aimed at reducing the negative environmental impact. An extra bonus from less packing weight for consumers will be the opportunity to reduce the environmental charges.

**SPET** is a material with unique features and temperature resistance from  $-40^{\circ}\text{C}$  to  $+220^{\circ}\text{C}$ , as well as top barrier properties.

PP

## Sealable containers

PET

Sealable containers are used for packaging (incl. in protective gas), storage, transportation and extending the shelf life of meat, poultry, ready-to-cook foods and ready meals, pastry, vegetables and fruit. Can be produced in combination of PP, PP/PE, PP/EVOH/PE, PET, PET/PE and SPET.

An integrated approach to the selection of tray material, napkins, sheets and equipment will increase shelf life up to 16 days.

#	size	material	color
1	190*144*45/50/55/65 mm	PP, PP/PE, PP/EVOH/PE, PET, PET/PE	transparent, black, white

## DISPOSABLE TABLEWARE

We buy plastic tableware when we plan outdoor activities, arrange small receptions, go on a trip or to a corporate party. Plastic disposable products well tolerate the effects of high temperature: plastic cups can be filled up with both cold and hot liquids, as well as they are microwavable.

Both individuals and reputable companies purchase disposable tableware. A wide range of disposable tableware is the key to the effective functioning of all fast food outlets, snack bars and summer cafes.

PP

## PP cups
